# Introduction I

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed pharetra at felis sed placerat. Suspendisse potenti. Vivamus tempus pharetra elit, bibendum pellentesque sem consequat a. Duis congue enim sem. Aliquam ipsum quam, eleifend eget leo eget, pharetra imperdiet nunc. Vestibulum consequat placerat laoreet.

# Introduction II

**Highlighting**

# Highlighting

Sometimes it is useful to highlight certain words in the text.

## Important message

If a lot of text should be highlighted, it is a good idea to put it in a box.

It is easy to match the colour theme.

# Lists

■ Bullet lists are marked with a red box.

1 Numbered lists are marked with a white number inside a red box.

Description highlights important words with red text.

Items in numbered lists like 1 can be referenced with a red box.

## Example

■ Lists change colour after the environment.

# Effects

## 1 Effects that control

Use textblock for arbitrary placement of objects.

# Effects

- 1 Effects that control
- 2 when text is displayed

Use textblock for arbitrary placement of objects.

## Theorem

*This theorem is only visible on slide number 2.*

# Effects

- 1 Effects that control
- 2 when text is displayed
- 3 are specified with `<>` and a list of slides.

Use **textblock** for arbitrary placement of objects.

# Effects

- 1 Effects that control
- 2 when text is displayed
- 3 are specified with `<>` and a list of slides.

Use **textblock** for arbitrary placement of objects.

# Effects

- 1 Effects that control
- 2 when text is displayed
- 3 are specified with `<>` and a list of slides.

Use **textblock** for arbitrary placement of objects.

It creates a box with the specified width (here in a percentage of the slide's width) and upper left corner at the specified coordinate (x, y) (here x is a percentage of width and y a percentage of height).
